Bringing Health Professionals Together

Health Directory Service

The GSMHN's Health Directory Service (HDS) is a directory that provides information on health care professionals. The directory is currently focused on Western Australia, and has been designed to provide both health care professionals and members of the public with the ability to search for both health professionals and services by:

- Name (this relates to both businesses and Individuals)
- Location
- Category (this relates to the type of service provided)
- Region

Home Search Browse Members About

Name

Category

Location

Region

When searching for a particular service, the HDS search results provide a list of the facilities that match your search criteria, as well as a map of your location and the facilities nearest to you. The Map, provided by Google, is interactive and can be expanded or contracted to show surrounding streets.

The HDS also incorporates the WA Medical and Surgical Specialist Referral Directory by Dr Stephen Hodby, which is being offered online for the first time. The HDS with the Specialist Referral Directory is only accessible via subscription, at a cost of \$27.50 per user per annum.

Bringing Health Professionals Together

- The HDS provides both a quick and advanced search option for users. Users can also browse the list of medical organisations and practitioners involved in the HDS
- Also provided is a tag cloud, which allows you to narrow your search based on the tags identified with the organisations that appeared in your list of results

You can view the publically available features of the Health Directory service at:
